Regional Anesthesia Blackboard Site to Help Standardize Curriculum

“The anesthesia residents now have the Regional Anesthesia curriculum available to them at all times, both in the OR and at their computers. The curriculum provides a structured approach to learning the clinical skills necessary to perform peripheral nerve blocks and provide clinical care to patients.”

David MacLeod
Division of Regional Anesthesia
Department of Anesthesiology

**Overview**

The Regional Anesthesia Blackboard site aims to improve and standardize the curriculum for first-year residents by providing a uniform set of diagrams, online quizzes and reading materials from e-reserves. The site will also feature a discussion board for reviewing difficult clinical cases.

**Goals**

- Provide comprehensive curriculum for regional anesthesia rotation (4 weeks)
- Provide up-to-date journal articles on specialist topics
- Encourage discussion of challenging and interesting cases
- Provide feedback of residents’ performance
- Direct links to regional anesthesia websites
- Promote clinical interest in subspecialty

**Sponsor**

- Center for Instructional Technology (CIT)

**Technologies Used**

- Blackboard
