Multimedia Project Studio (MPS)

OIT / Academic Technology Services

"The MPS offers not just the space to create multimedia projects for courses; it also gives you the space to dream—a place to generate your own ideas for projects and the tools and encouragement from others to carry them out."

Overview

The Multimedia Project Studio (MPS) is a multimedia production lab for students, faculty, and staff. Located in 016 Old Chemistry Building, the lab features high-end, integrated hardware and software that encourages imaginative creation and editing of graphics, Web pages, audio, and video.

Technologies Available

Production tools include industry standards, such as Apple’s Final Cut Pro for video editing, Macromedia’s Dreamweaver for Web design, and Adobe Photoshop for photographic manipulation. Eight top-of-the-line workstations are equipped with LCD displays and specialized peripherals, such as drawing tablets, scanners, video digitizers, and DVD burners.

Support

Trained technicians are on staff to help you with your multimedia projects. To get acquainted with the staff and their particular areas of multimedia expertise, check out the MPS staff profiles at http://www.oit.duke.edu/ats/mps/. While in the lab, you can also get help from the learning library stocked with manuals and other reference materials.
