MULTIMEDIA PROJECT:
A creative representation of your observations about education and immigration

Objectives:
• Represent experiences and personal observations from your service
• Develop some aspects of the themes discussed in class
• Select the most appropriate sources to develop a critical reflection
• Demonstrate an appropriate control of Spanish

Expectations:
You will present a multimedia project that will consist of an 8 to 9 minutes visual and oral presentation.

During the semester you will need to find things to incorporate into your presentation. You may use materials from schools (students, teachers, administrators), support groups for Latinos, resources that we use in class, etc.. The project should develop a personal reflection of your experiences throughout the semester through the selection of visual and oral artifacts. The project should show an original and clear exploration of the relevant themes from class and show evidence of critical reflection.

The visual: The PowerPoint slides should contain photos, drawings, activities, pamphlets, etc.. You could include maps, graphs, statistics, etc. from academic sources. If you do not have enough slides for the entire presentation you may repeat the sequence and cycle through them again to complete the presentation.

The oral: Select segments of the blogs, interviews, music, poetry, testimonials, facts from local organizations, etc to include in the oral part. This section is not an explanation of the visual images but it is another dimension of the project that develops the selected theme. Develop an oral commentary that shows a critical reflection of your observations related to education and immigration.

The superior presentation shows control of grammar and relevant vocabulary and has an organization appropriate to developing the thread of the project.

Assessment of the Multimedia Project:
